- Expert in written and verbal communication.
- Skilled in time management, prioritizing tasks, and meeting deadlines.
- Skilled with PowerShell, Linux Shell, C, C++, Python, Html, CSS, Javascript, Github, Docker

Experience

Customer Service Representative

U.S. Cellular | Tulsa, Oklahoma

January 2018 to October 2022

- Responsible for handling business customer calls with the highest standard of professionalism and courtesy, addressing customer issues and ensuring company standards are met on every call.
- Receive inbound calls from customers with delinquent accounts to obtain payment commitments, take payments and answer inquiries to ensure Financial Services goals are met.
- Maintain strong knowledge of all company products and services, including handsets, accessories, pricing, plans, promotions, and service features.

Security Officer

G4S Security Solutions | Tulsa, Oklahoma

January 2017 to January 2018

- Perform security patrols of designated areas on foot and by vehicle
- Watched for irregular or unusual conditions that may create security concerns or safety hazards
- Investigate and prepare reports on accidents, incidents, and suspicious activities
- Provide assistance to those in need in a courteous and professional manner.

Education

Full-stack Web Development and Computer Science | Atlas School | Tulsa, Ok

October 2022 to April 2025 | Diploma in Computer Science in Virtual Reality and Augmented Reality

- Studied computer programming languages with a focus on web development in a peer-focused learning environment. We attended full-time and learned new concepts at a rapid pace.

Projects

AirBnB - Lead Developer

- I recreated the AirBnB website including back-end, scripting and database functionality.
- Implimented using Html, CSS, Javascript, Python, Docker, and JSON data structures.

Tasty or Toxic - JavaScript Developer

- Created a custom website utilizing a public API to assist with wild plant identification
- My role in this project was scripting the API integration into the website, to display the data into a table, and allow keyword and search features.
